بِسْمِ اللهِ الرَّحْمٰنِ الرَّحِيمِ

BARKAH FLOW

Module 1 — Sunnah Library | Feature 12

TAWBAH OS

Islamic Nafs Rehabilitation System

Complete Workflow v3.0 — All Engines + All Red Flags Fixed + Fiqh-Aware + Safety-Integrated

CONFIDENTIAL — Founder Only

CHANGE LOG — v2 → v3

Yeh document v2 (original) ka evolution hai. Mentor review ke baad yeh integrations kiye gaye:

#	Category	Change	Reason
1	🔴 Red Flag	Crisis Protocol mein helpline integration — Islamic-first, non-intrusive	App store policy + legal liability + Maqasid al-Shariah (hifz al-nafs)
2	🔴 Red Flag	Engine 0 — concrete detection mechanism specified per heart disease	Previously aspirational — ab implementable
3	🔴 Red Flag	Tier Detection logic — hybrid (user self-select + AI confirm)	Previously missing — ab concrete decision tree
4	🟡 Amber	Crisis-Safe Ayaat Pool database (curated, not random)	Random se warning/azab ayaat aa sakti thi — damage risk
5	🟡 Amber	Kafarat 3-Layer Safety → code-enforced middleware (prompt nahi)	AI at temp 0.7 prompt bhool sakta hai
6	🟡 Amber	Relapse Prediction —	OS-level tracking

#	Category	Change	Reason
		scope clarified to IN-APP USAGE only	permissions risk + privacy concerns
7	🟡 Amber	Mental Health Bridge — distress threshold → professional help nudge	Shaytan-loop framing + clinical conditions overlap risk
8	🟡 Amber	Fiqh-Selection Feature integrated — NO “refer to mufti for other fiqh” (app already handles this)	User selects fiqh onboarding → all rulings auto-delivered per fiqh
9	🟢 Addition	First-Time Onboarding Flow (60-second intro)	Cold open intimidating tha
10	🟢 Addition	Exit / Graduation Pathways (complete, pause, break mode)	Users must have dignified off-ramp
11	🟢 Addition	Session State Machine specification	Enforces “ek session = ek goal” rule at backend
12	🟢 Addition	Tier-3 Fiqh Complexity List — when AI Mufti referral stays mandatory	Intra-fiqh sub-school differences
13	🟢 Engineering	Code-Enforced Safety Middleware layer specified	Trust code, not prompts, for red lines
14	🟢 Terminology	“Madhhab” → “Fiqh” throughout	Global clarity + educational accessibility

OVERVIEW — TAWBAH OS KYA HAI

Duniya ka pehla Islamic Nafs Rehabilitation System. Placement: Tab 4 (رُوح) — Private section — Lock icon ke saath.

Element	Detail
Placement	Sunnah Library → Tab 4 (رُوح) → Private Section — Lock icon
Privacy	On-device display — AES-256 encrypted

Element	Detail
	cloud — server sirf encrypted blob
Tone Foundation	Zero shame — Al-Awwaboon — wapas aana izzat hai
Islamic basis	Ibn al-Qayyim (Madarij), Imam Ghazali (Ihya), Imam Nawawi, Quran + Sunnah
Fiqh Awareness	User onboarding mein fiqh select karta hai — saari rulings auto-delivered per selected fiqh
Fitrah OS link	Har action → TAZKIYA dimension feed karta hai — BACKEND ONLY — frontend par raw points kabhi nahi
Crisis protocol	Khudkushi / self-harm detect → Islamic warmth primary + helpline subtle secondary
Session rule (LOCKED)	Ek session = ek dominant goal. Backend state machine enforces

3 Entry Categories — Fundamental Distinction

Category	Example	Tone	Engines Used
Single Gunah	Ek baar hua — jhooth, gali	Compassionate — 'Allah maaf karne wala hai'	LIGHT — Engine 1 quick + Engine 2 — Done
Recurring Gunah	Baar baar hota hai — pattern bana hua	Encouraging — 'Yeh journey hai'	MEDIUM — Engine 0+1+2+3
Addiction / Crisis	3+ mahine — control nahi — distress high	Gentle — Al-Awwaboon	SEVERE — Full OS phased
Bad Habit — NOT sin	Raat dair se sona	Coach mode ONLY — zero tawbah angle	Engine 1+3 only

3 Severity Tiers — LOCKED RULE

Ek session = ek dominant goal. Sab cases ko same OS depth mat do. Pehle tier detect karo — phir sirf us tier ka path chalo.

Tier	Detection Signal	What Happens	What Does NOT Happen
LIGHT — Simple Slip	Ek baar — user khud jaanta hai galat tha	Engine 1 quick check → Tawbah 3 conditions → Done in 2 min	Engine 0 skip. Kafarat quiz skip. Istidraj skip. Waswas check skip.
MEDIUM — Recurring	Baar baar — 2-4 hafte — koshish ho rahi	Engine 1 → Engine 0 (reflective only) → Engine 2 → Engine 3	Full addiction protocol skip. Crisis mode skip.

Tier	Detection Signal	What Happens	What Does NOT Happen
		basics → Engine 4 weekly	
SEVERE — Addiction / Crisis	3+ mahine — control nahi — user distressed	Full OS — phased over weeks — all engines active	Sab ek session mein nahi — phased delivery

Tier Detection Logic — NEW (Hybrid Model)

Tier decision *ek single decision point* hai jo har session shuru mein lagta hai. Teen inputs milte hain:

Step 1 — User Self-Selection (Primary):

Entry screen par 3 buttons: - "Ek baar galti ho gayi — tawbah karni hai" → LIGHT flag - "Baar baar hota hai — rokne ki koshish hai" → MEDIUM flag - "Control nahi hai — 3 mahine se zyada — madad chahiye" → SEVERE flag

Step 2 — AI Confirmation (Secondary):

AI user ke brief description par NLP analysis kare. Signals: - Duration words ("hafte," "mahine," "saalon") → MEDIUM/SEVERE shift - Distress markers ("rok nahi pa raha," "bas hota hai," "koi raasta nahi") → SEVERE shift - Frequency markers ("roz," "daily," "har raat") → MEDIUM/SEVERE shift

Step 3 — Historical Context (Tertiary):

Agar user ke past sessions mein same gunah 3+ check-ins hain → automatic MEDIUM minimum, even if user LIGHT select kare.

Conflict Resolution Rule: Agar user LIGHT select karay lekin AI + history SEVERE detect karay, AI softly ask kare: *"Aap ne 'ek baar' kaha — lekin yeh issue pehle bhi aaya hai. Kya yeh baar baar ho raha hai? Taake main sahi madad de sakoon."* — User ki final choice respect karo, par data-driven nudge de do.

Locked Rule: Tier upgrade *allowed* hai (LIGHT → MEDIUM during session). Downgrade *disallowed* (SEVERE → LIGHT). Kyun? Downgrade mein risk hai ke user ghabra kar escape karne ke liye tier kam kare, aur kaam adhoora chhoote.

BAB-UL-TAWBAH — Hamesha visible, har state mein: 'Beshak Allah ka darwaaza abhi khula hua hai. Band hoga jab: maut aaye ya suraj maghrib se nikle.' (Hadith — Bukhari/Muslim)

FIRST-TIME ONBOARDING — NEW

Pehli baar user Tawbah OS mein aaye — cold open kabhi nahi. Ek 60-90 second guided introduction.

Screen 1 — Welcome (10 sec)

"Yeh Tawbah OS hai. Aap ke aur Allah ke darmiyan ek private space. Koi tracking nahi. Koi judgement nahi. Koi social feed nahi. Sirf aap, aap ki niyyah, aur rehmat ka darwaaza."

Single button: "Aage badhen"

Screen 2 — Privacy Promise (15 sec)

"Aap jo kuch yahan share karen ge — encrypted hota hai. Hum tak bhi nahi pahunchta. Sirf aap dekh sakte hain. Aap ke phone mein. Aap ke control mein."

Visual: Lock icon + AES-256 encryption indicator (simple, not technical)

Button: "Samjh gaya"

Screen 3 — Fiqh Selection (30 sec) — CRITICAL

"Kuch masail mein fiqh schools ka farq hota hai. Aap kaunsi fiqh follow karte hain? Is ke hisaab se aap ko guidance milegi."

Options (radio button): - Hanafi (default — Pakistan/India/Bangladesh/Turkey) - Shafi'i - Maliki - Hanbali - Ahle Hadith - *"Mujhe nahi pata — mere liye Hanafi rakh do"* (soft default)

Note neeche: *"Aap yeh baad mein settings mein change kar sakte hain."*

Screen 4 — Tone Preference (15 sec)

"Aap ki zubaan aur tone kaunsi rakhi jaye?"

- Urdu-English mix (default Pakistan)
- Urdu formal
- English formal
- Hindi-English mix
- Arabic phrases emphasized

Screen 5 — How It Works (20 sec)

"Jab aap yahan aayen ge, teen sawaal milen ge: - Kya tawbah karni hai? - Koi aadat todni hai? - Sirf check-in karna hai?

Jawab aap ka. Hamara kaam sirf Allah tak pahunchane ka raasta saaf rakhna hai."

Final button: "Shuru karen — Bismillah"

→ **Fitrah OS: tawbah_os_onboarded → TAZKIYA +5 (one-time)**

ENTRY POINTS — USER KAISE AATA HAI

Entry 1 — Regular Mode

- User Tab 4 (رُوح) tap kare
- Private section — lock icon — biometric unlock
- Landing screen: 3 options — 'Mujhe tawbah karni hai' | 'Koi aadat todna hai' | 'Sirf check-in karna hai'
- Option ke hisaab se Engine start ho — pehle tier detection

Entry 2 — 'I Need Help Now' (Crisis/Urgent)

Yeh emergency entry point hai — user immediate crisis mein hai. Dashboard par bhi visible hona chahiye — sirf Tab 4 tak limited nahi.

- Dashboard ya Tab 4 par — RED button: 'Abhi Madad Chahiye'
- Tap karte hi — INSTANT: Bab-ul-Tawbah message + 3 quick actions:
  - 'Astaghfirullah 3 baar bol do — abhi' → button
  - 'Wuzu karo — 2 minute' → timer start
  - 'Ek ayat padho' → *Crisis-Safe Ayaat Pool* se random (not entire Quran — see section below)
- Phir gently pooche: 'Kya aur madad chahiye?' → full Engine 1 flow
- Agar 'main apne aap ko hurt karna chahta hun' words detect hon → CRISIS PROTOCOL (see Special Protocols)

Entry 3 — Dashboard 'How is your heart?' (Qalb State)

Architecture: Chat = emotional processing (hamesha). Router = background direction (silently). Dono simultaneously — user sirf chat dekhta hai.

- Dashboard par roz: 'How is your heart feeling today?' — 7 heart icons
- User click kare → 2 cheezein ek saath ho:
  - Step A — CHAT (always): Akhlaq AI chat immediately open — state-specific opening line (from JSON pool, rotating — not fixed)
  - Step B — ROUTER (background): System silently decide kare kaunsa engine/feature sidebar mein suggest kare

Qalb State	Chat Opening (from rotating pool)	Background Router Suggests
Hard heart	'Dil sakht lagta hai — yeh bhi ek haal hai…'	Engine 0 reflective + small amal + Quranic Mirror
Soft heart	'MashAllah — aaj dil naram hai…'	Tahajjud push + deeper ibadah + Sahaba mission
Distracted	'Tawajjuh idhar udhar hai —	Micro action — 1 dhikr — no

Qalb State	Chat Opening (from rotating pool)	Background Router Suggests
	kya chal raha hai?'	deep lecture
Ghafil	'Ghaflat feel ho rahi hai…'	Micro action only — 1 dhikr — no engine routing
Present	'Dil haazir hai — Alhamdulillah'	Tahajjud + deeper ibadah + Sahaba mission
Broken	'Dil toot sa gaya hai — Allah jaanta hai…'	Sabr Builder (primary) + Private Ibadah Chamber + Dua Therapy
Hopeful	'Umeed hai — yeh Allah ka noor hai…'	Engine 5 rising + new mission + Crystal growth

Implementation note: Har state ke liye 5 rotating lines JSON mein hon (`qalb_state_opening_lines.json`) — taake repetition boring na ho aur user feel kare app "alive" hai.

Silent Assist Mode

Kabhi kabhi user kuch nahi likhta — chat open hai — lekin woh sirf dekh raha hai. AI sirf ek cheez de — ek ayah ya ek line — silence ke saath.

Example — Broken state, user kuch nahi likha: AI: 'Allah tumhara haal jaanta hai.' — Bas. Koi follow-up nahi. Koi prompt nahi.

→ **Fitrah OS: qalb_state_logged → TAZKIYA +3**

ENGINE 0 — AMRAAZ-UL-QALB (Reflective Awareness — NOT Diagnosis)

Ibn al-Qayyim ki Madarij al-Salikin aur Imam Ghazali ki Ihya se. Sab behavioral sins ki jadd mein 7 heart diseases ho sakti hain. Symptom treat karna kaafi nahi — root tak jaana behtar hai.

Engine 0 KABHI directly label nahi karega — 'Aap mein kibr hai' nahi bolta. Hamesha reflective language: 'Aap ke pattern mein kibr jaisi kuch alamat nazar aa rahi hain' ya 'Is area mein muhasaba karo'. User ko shock ya resistance nahi deni.

7 Heart Diseases — With Concrete Detection Mechanisms (NEW)

Disease	Arabic	Detection Mechanism (How App Actually Knows)	Primary Treatment
Kibr	كبر	**1)** Reflection	Tawadu practice +

Disease	Arabic	Detection Mechanism (How App Actually Knows)	Primary Treatment
		Questionnaire (7 Qs, monthly). **2)** NLP on user text: “main sahi hoon / woh ghalat hai / mujhe seekhne ki zaroorat nahi” phrase patterns across 10+ sessions. **3)** Feedback resistance signal: AI ne muhasaba suggest kiya, user ne 3+ baar dismiss kiya.	Seerah: ‘Nabi (SAW) ghulam ke sath khana khate the’
Hasad	حسد	**1)** Reflection Questionnaire (monthly). **2)** NLP on text: “us ko kyun mila / mujhe bhi chahiye tha / unki taraqqi dekh ke” pattern. **3)** Self-report in muhasaba — user khud mention kare.	Sitr + Dua for that person + Surah Falaq regular
Riya	رياء	**1)** Reflection Questionnaire. **2)** Behavioral: user check-ins mein “dekhaane ke liye kiya” self-report. **3)** Pattern: high-visibility amal (public sadaqah social mention) vs low-visibility amal (sirri nafil) ratio.	Sirri amal challenge + Ikhlas reset
Hub al-Dunya	حب الدنيا	**1)** Reflection Questionnaire. **2)** Pattern: MAAL dimension actions high but TAQWA low	Zuhd practice + Maut ka zikr weekly

Disease	Arabic	Detection Mechanism (How App Actually Knows)	Primary Treatment
		consistently 30+ din. **3)** NLP: financial anxiety language frequency.	
Bukhl	بخل	**1)** Sadaqah logging zero/rare over 60+ din despite financial stability. **2)** Zakat calculated but not paid (delay >30 din). **3)** Self-report.	Gradual sadaqah + Quran 3:180
Ghadab	غضب	**1)** User log: anger triggers in Akhlaq AI. **2)** Recurring domestic tension check-ins. **3)** Sabb/lanat actions self-reported 3+ in 30 din.	Wuzu protocol + Engine 3 anger loop
Shahwat	شهوة	**1)** Tawbah OS logs: porn/masturbation/ nazar recurring pattern. **2)** Self-report in check-in. **3)** Relapse prediction data.	Roza + Nikah guidance + Engine 3 full addiction protocol

CRITICAL Design Rule for Detection: 1. **NLP Detection is never deterministic** — always triggers Reflection Questionnaire, not direct diagnosis. 2. **Reflection Questionnaire** = 7 Yes/No questions per disease, user-answered, self-aware. Example for Kibr: *"Jab koi aap ko kuch sikhata hai, kya aap ko uspar zyada kaam karna padta hai khud ko khulne ke liye?"* 3. **Minimum 2 signals required** before app even *hints* at a potential root disease. Single signal = silence. 4. **Always reflective framing** — never authoritative.

Engine 0 — Reflective Flow (MEDIUM/SEVERE only)

- Background: User ka app activity + Tawbah OS check-in data analyze karo (in-app data only — see Engine 3 scope clarification)
- Pattern notice karo — reflective framing: 'Aap ke recent patterns mein [area] se related kuch nazar aa raha hai — sirf sochne ke liye' — hard claim nahi
- Possible root area suggest karo — ALWAYS with reflection wrapper: 'Shayad yahan [disease] ka ansar ho — kya aap is par ghoor karna chahenge?'

- Gently present karo — NEVER authoritative diagnosis. ‘Yeh dil ki ek haalat hai — Allah theek kar sakta hai. Kya is par kaam karna chahoge?’
- Treatment plan: specific ayaat + zikr + amal — disease ke mutabiq
- **Gunah Impact Visualizer:** Private logging → AI show kare heart dullness impact, barakah drop — fear nahi, sirf awareness

→ Fitrah OS: amraaz_ul_qalb_session → TAZKIYA +6

ENGINE 1 — NAFS DIAGNOSIS

User apni struggle bataye — AI classify kare, root cause dhundhe, sahi engine activate kare. Har case mein yeh pehle chalta hai.

Tier-Aware Diagnosis Flow — Minimalism Rule

Engine 1 = tier-aware minimalism. LIGHT cases sirf 3 steps. Baaki steps MEDIUM/SEVERE mein activate hote hain.

LIGHT Tier — 3 Steps Only

- Classify: Yeh gunah hai, bad habit hai, ya recurring?
- Huquq check: Kisi insaan ka haq involved? Agar haan → maafi maangne ka brief guide → phir tawbah
- Tawbah: Engine 2 Light path → Done

LIGHT mein SKIP karo: waswas check, kafarat deep logic, mawani check, root disease, Engine 0

MEDIUM Tier — Additional Steps Activate

- Upar ke 3 steps PLUS:
- Waswas flag: Ek hi gunah 3+ baar same session → ‘Yeh waswas ho sakta hai — aage badho, Allah ne sun liya’
- Kafarat check: Koi specific kafarat wajib? (Roza toda, qasam toodi) → User ki selected fiqh ke hisaab se ruling delivered (Tier-3 complexity list mein nahi to)
- Engine 0 link: Gentle reflective question about possible root area

SEVERE Tier — All Checks Active

- Sab upar ke steps PLUS:
- Mawani check: Israr / Aman min Makr Allah / Qunoot / Tawbah postpone pattern?
- Full Engine 0 reflective session
- Route to Engine 3/4/5 as needed — phased over sessions

Aqal vs Nafs Negotiation System

User kisi struggle mein ho — AI dono awaazein simulate kare. User apni battle dekh sake.

- User struggle bataye: ‘Music sun na chahta hun’ ya ‘Rishwat lena chahta hun’

- AI dono sides present kare:
  - Nafs ki awaaz: ‘Ek baar chalega — sirf thodi der — koi nahi dekhega’
  - Aql/Fitrah ki awaaz: ‘Teri asli khwahish chain hai — woh yahan nahi milega’
- Phir AI correct path reinforce kare — evidence ke saath
- Micro action: ek specific alternative — abhi ke liye

→ **Fitrah OS: aqal_nafs_battle_engaged → TAZKIYA +5**

ENGINE 2 — TAWBAH ROADMAP

Sirf gunahon ke liye — bad habits ka yahan koi angle nahi. Sachchi tawbah ka complete Islamic process.

3 Conditions of Tawbah — Imam Nawawi

Condition	Arabic	Meaning	App Verification
Imsak	الإمساك	Gunah se foran rukna	‘Abhi is gunah se ruk jaao’ — checklist
Nadim	النادم	Sachcha pichhtawa — dil se	Reflection: ‘Kya dil mein sachcha pichhtawa hai?’
Azm	العزم	Dobara na karne ka pakka iraada	Commitment: ‘Main azm karta hun’ — user confirm kare

Hadith: ‘Al-nadimu tawbatun’ — Nadim hona khud tawbah hai. (Ibn Majah — Hasan Sahih)

Tawbah Nishaniyaan — Signs of Accepted Tawbah

AI HAMESHA yeh disclaimer ke saath bataye: *‘Tawbah ki qabooliyyat ka ilm sirf Allah ko hai. Teri zimmedari sachchi tawbah karna hai — qabool karna Uska kaam hai.’*

Nishani	Source
Gunah ke baad dil mein bhaari pan — pichhtawa	Hadith: ‘Al-nadimu tawbatun’
Usi gunah ki jagah jaane se nafrat	Ibn al-Qayyim — Madarij
Allah ke nazdik jaane ki khwahish barhe	Imam Ghazali — Ihya
Gunah yaad aaye to dard ho — khushi nahi	Ibn al-Qayyim
Naik logon ki sohbat achhi lagne lage	Scholars consensus
Ibadat mein luft badhe	General scholars consensus

Al-Awwaboon Concept — Relapse = Not Failure

Quran 17:25: 'Innahu kana lil-awwabeena ghafouran'. Awwaboon = Jo baar baar laute. Baar baar tawbah karna weakness nahi — Awwaboon ka level hai.

Agar relapse ho: *'Al-Awwaboon woh hain jo baar baar laute — aaj phir aa gaye — yeh izzat hai.'*

Kafarat Guidance — Fiqh-Aware Delivery

NEW RULE: App user ki selected fiqh ke hisaab se automatic ruling deliver karta hai. Koi "poocho mufti se" nahi — app khud jaanta hai.

Auto-Delivered Cases (95% of kafarat scenarios):

Gunah	Hanafi	Shafi'i	Maliki	Hanbali	Ahle Hadith
Kasam toodi	10 miskeen khana/libaas ya 3 din roza (5:89)	Same with detailed sequence	Same with Maliki specifics	Same	Same
Ramzan roza toda (jaan-boojh kar)	Qaza + 60 din musalsal roza ya 60 miskeen khana	Qaza + 60 din roza (strict sequence)	Qaza + 60 din roza + itq	Qaza + 60 din roza ya 60 miskeen	Qaza + 60 din roza
Gheebat ki (uska ilm hai)	Uss se maafi maango	Uss se maafi maango	Uss se maafi maango	Uss se maafi maango	Uss se maafi maango
Gheebat ki (ussay ilm nahi)	Uski maghfirat ki dua karo	Same	Same	Same	Same
Kisi ka maal khaya	Maal wapas + maafi	Same	Same	Same	Same

Implementation Note: Yeh table `fiqh_rulings_kafarat.json` mein hogi — har entry mein Arabic source + English translation + Urdu guidance per fiqh.

Tier-3 Fiqh Complexity Cases — Mufti Referral Still Required

Yeh cases intra-fiqh sub-school differences ki wajah se AI-only deliver nahi hon ge — AI Mufti ya human Alim refer karna mandatory:

Case	Why Human Referral
Zihar kafarat (apni biwi ko maa ki tarah keh dena)	Complex conditions + rare + sub-school differences within each fiqh
Li'an (spousal accusation)	Legal implications + fiqh + state law interact
Triple talaq in one sitting	Contemporary ikhtilaf even within Hanafi

Case	Why Human Referral
	(Ahle Hadith vs Deobandi vs Barelwi)
Multiple marriage dispute kafarat	Individual circumstances heavy
Inheritance dispute atonement	Case-specific fiqh interpretation
Complex contract/business ribaa kafarat	Modern financial instruments — needs scholar analysis
Abortion (intentional, post-soul)	Severe + life-stage sensitive + ijtihaadi differences
Qatl-e-khata (accidental killing) kafarat	Legal + fiqh + severe consequences

Output for Tier-3 cases: *"Yeh masla complex hai — aap ki selected fiqh mein bhi scholars ke darmiyan farq hai. Yahan AI Mufti ya qualified Alim se direct poochna hi sahi hai. [Connect to AI Mufti button]"*

3-Layer Safety Wrapper — CODE-ENFORCED (NOT Prompt-Based)

Har kafarat response par yeh 3 lines automatic append hon gi via backend middleware — AI prompt ki instruction par trust nahi. Implementation:

```
IF
response.contains_keyword(['kafarat','kaffarah','fidya','expiation']):
    response.append(
        "1) Yeh guidance [user.selected_fiqh] fiqh ke mutabiq hai.
         2) Aap ke individual case ki tafaseel mein kuch farq ho sakta
hai.
         3) Behtar hai ki AI Mufti se confirm kar lain ya qareebi Alim
se mashwara karein."
    )
```

Yeh middleware **har AI output par chale** — engineering non-negotiable.

Huquq-ul-Ibaad Separate Path

- AI detect kare: Kya kisi insaan ka haq involve hai?
- Agar haan: 'Pehle us insaan se maafi maango — phir tawbah'
- Practical steps:
  - Face to face maafi — agar possible
  - Call / message — agar seedha nahi ho sakta
  - Agar woh marr gaya ho: Sadaqah unki taraf se + dua + maal wapas warsa ko
- Tawbah ke baad: standard Engine 2 flow

KABHI NAHI: 'Sirf tawbah kar lo — Huquq-ul-Ibaad mein kaafi hai.' Allah maaf nahi karta jab tak woh insaan maaf na kare.

→ **Fitrah OS: tawbah_huquq_ibaad_done → IHSAN +12 + TAZKIYA +8**

ENGINE 3 — HABIT & ADDICTION BREAKING

Recurring gunahon aur bad habits ke liye. Islamic framework + Modern habit science.

Bad Habits — 3 Subtypes

Subtype	Examples	Tone	Engine
Neutral habit	Late sona, zyada khaana, procrastination	Helpful coach — zero tawbah angle	Engine 3 coach mode only
Spiritually harmful habit	Screen time causing Fajr miss, social media with haram exposure	Gentle spiritual awareness — light tawbah angle optional	Engine 1 light + Engine 3
Sin-adjacent habit	Compulsive behavior bordering on gunah, harmful content pattern	Acknowledge the line — encourage stepping back	Engine 1 → tier detect → full flow if crossed

Two-Source Framework

Source	What It Provides
Islamic Framework	Nafs ki 3 Quwwat (Shahwat, Ghadab, Aql). Amraaz-ul-Qalb (Engine 0). Specific zikr per addiction. Muhajir Protocol.
Modern Habit Science	Habit Loop: Trigger → Craving → Response → Reward. Replacement theory. 21/66 day formation.

Shaytan Pattern Recognition

User ke patterns track karo — same sin, same time, same trigger, same excuse. Awareness = break.

- 7-14 din ka pattern analyze karo (**in-app data only** — not system-wide device)
- Pattern detect: 'Har raat 11 PM par — phone par — alone hone ke baad'
- AI present kare: 'Yeh loop hai: Loneliness → Phone → Trigger → Sin'
- Islamic intervention: 'Shaitan is waqt aata hai — aaj 10:30 PM par yeh karo:'
  - Wuzu karo
  - Kisi ko message karo — ek salam
  - Tahajjud ki niyyah karo — sona

Mental Health Bridge — NEW: Agar Shaytan Pattern Recognition mein distress score 7+/10 ho ya user 30+ din mein 15+ relapse check-ins log kare, AI softly bridge:

"Allah ki taraf se shifaa kayi raaston se aati hai — kabhi dua se, kabhi amal se, kabhi qualified insaan ki madad se. Shariah mein doctor ya counselor se milna bhi ilaj hai — Ibn al-Qayyim ne

bhi kaha hai ke tibb-e-rooh aur tibb-e-badan dono Islamic hain. Kya aap is par thoda ghoor karenge?"

Bas — itna. No push, no stigma, no "you must see a doctor." Sirf door khol do.

→ **Fitrah OS: shaytan_pattern_identified → TAZKIYA +6**

Habit Breaking Flow — 6 Steps

- **Trigger Map:** Kab, kyun, kahan habit hoti hai — exact pattern (in-app data + self-report)
- **Islamic Replacement:** Har trigger ke liye ek Sunnah response

Common Trigger	Islamic Replacement
Loneliness + phone at night	Wuzu → 2 rakat nafil → Surah Mulk
Stress at work	4 baar Astaghfirullah → deep breath → short walk
Boredom + social media	Subah adhkar → Quran 5 min → purpose reminder
Anger trigger	Aoodhu + wuzu + jagah badlo → 10 min break
Financial stress	Quran 65:3 (tawakkul) → write rizq gratitude list

- **Muhajir Protocol (severe cases):** Environment change checklist
  - Phone se specific apps delete karo
  - Bedroom se phone bahar rakho
  - Specific contacts limit karo
  - Kaunsi jagahon se parhez — environment mapping
- **Relapse Prediction Engine** (in-app usage patterns only)
- **Progress tracking:** 7/14/30/60/90 day milestones

Relapse Prediction Engine — Scope Clarified

Track (**in-app data only**): user-logged emotional triggers + user-logged time patterns + past Tawbah OS check-ins + relapse history. **No OS-level device tracking.**

- App user ke past relapse patterns learn kare
- High-risk window detect karo: 'Har hafte Tuesday raat 11 PM'
- 30-60 min PEHLE gentle intervention:
  - 'Aaj ka waqt thoda mushkil lagta hai — abhi wuzu karo'
  - Relevant ayat push (from Crisis-Safe Ayaat Pool)
  - 'Emergency mode' ready rakhna

Emergency Mode — Urge Aa Rahi Hai

- Screen dim — sirf ek button: 'Main rok sakta hun'
- Astaghfirullah 3 baar — bol ke — button

- Wuzu karo — 2 minute — timer
- 2 rakat nafil — kahi bhi
- Relevant ayat — full screen (from Crisis-Safe Ayaat Pool)
- ‘Aap ne is lehar ko roka — Alhamdulillah. Aaj aap ne apne nafs par ek qadam jeeta.’ — Dignified. Koi streak badge nahi, koi fauji metaphor nahi.

→ **Fitrah OS: emergency_mode_completed → TAZKIYA +10**

7 Qabooliyat Times — Relapse Prediction Mein Integrated

Waqt	Source	App Notification
Raat ka aakhri tehai (2-4 AM)	Bukhari/Muslim	‘Allah abhi sun raha hai — kya tawbah karna chahoge?’
Fajr se 30 min pehle	Tahajjud time	‘Fajr se pehle ek dua — Rehmat qareeb hai’
Adhan aur Iqamat ke darmiyan	Tirmidhi Hasan	‘Abhi dua qabool hoti hai — maafi maango’
Jumuah ka aakhri ghanta	Abu Dawood Hasan	‘Jumuah ka khaas waqt — tawbah aur dua’
Baarish ka waqt	Abu Dawood	Weather API — ‘Baarish mein dua radd nahi hoti’
Day of Arafah	Muslim	Islamic calendar
Laylatul Qadr	Quran 97:1-5	Islamic calendar

‘Allah Wait Kar Raha Hai’ — Sacred Lines Rotation

Yeh line bahut powerful hai — isliye har jagah use nahi karni. Impact tab hoga jab yeh rare ho.

Moment	Line to Use
Tahajjud / raat ka aakhri tehai	‘Allah wait kar raha hai’
Crisis / broken state	‘Allah wait kar raha hai’
Relapse ke baad guilt mein	‘Allah wait kar raha hai’
Daily reminders	‘Allah ke darwaze abhi khulay hain’
Casual notifications	‘Rehmat qareeb hai’
Morning check-in	‘Yeh wapas aane ka waqt hai’
Streak break recovery	‘Woh sun raha hai’
General tawbah prompts	Rotate — kabhi kabhi sirf ek ayat — koi line nahi

ENGINE 4 — ANONYMOUS ACCOUNTABILITY

Weekly check-in. No shame. Al-Awwaboon angle. Istiqamah tracker. Internal Dialogue Trainer. Ruhani Fatigue Detector.

Weekly Muhasaba — 3 Questions

Question	Options	Response
Is hafte koi relapse hua?	Nahi / Ek baar / Zyada	Nahi = celebrate. Hua = Al-Awwaboon + wapas aane ka plan
Azm abhi bhi hai?	Haan / Thoda weak / Nahi pata	Weak = support + tips. Nahi = Engine 2 restart
Koi trigger tha is hafte?	Haan — kaunsa / Nahi	Trigger log — pattern build (Engine 3 feed)

Streak Milestones

Milestone	Message	Action
7 din	'Al-Awwaboon mein khush amdeed — 7 din'	Crystal TAZKIYA +10 bonus
14 din	Sahaba story: Hazrat Ka'ab ibn Malik (RA) ki tawbah — 50 din	TAZKIYA +15 bonus
30 din	'30 din — ek aadat islah ho rahi hai' — SubhanAllah	TAZKIYA +25 bonus + special dua
60 din	Modern science: 'Habit formed — yeh ab aapki Fitrah ban rahi hai'	Crystal celebration
90 din	Before/after comparison — transformation visible	Fitrah DNA update

Relapse Response: Streak reset nahi karo — 'Aaj phir shuruat karo' better hai. Koi shame nahi. 'Al-Awwaboon woh hain jo baar baar laute — yeh izzat hai.'

Istiqamah Tracker

Consistency > intensity. Real success = comeback speed. Kitni jaldi uthta hai girne ke baad.

- Track: Relapse ke baad kitne din mein wapas aaya
- Score: Comeback speed badh rahi hai → 'Aap ki resilience strong ho rahi hai'
- Jumuah weekly: 'Is hafte aap ne [X] din maintain kiya — pichle hafte se behtar'
- Long-term: 6-month chart — ups aur downs dono show karo

→ **Fitrah OS: istiqamah_weekly_checked → TAZKIYA +4**

Internal Dialogue Trainer

- User koi negative thought share kare: ‘Main kabhii theek nahi hoonga’
- AI identify kare: Yeh kaun si inner voice hai? Shaitan / Nafs / Qalb?
- Correct karo — Islamically:
  - ‘Main kabhii theek nahi hoonga’ → ‘Allah ki rehmat se mayoos hona haraam hai — Quran 39:53’
  - ‘Main bahut bura insaan hun’ → ‘Tu Allah ka banda hai — Fitrah paak hai — gunaah ne dhaka hai’
  - ‘Kya faida tawbah ka — wahi karoon ga’ → ‘Al-Awwaboon ka concept samjho — wapas aana hi ibadat hai’
- Ishlaah: Correct thought version likho — user repeat kare

→ **Fitrah OS: internal_dialogue_corrected → TAZKIYA +5**

Ruhani Fatigue Detector

- Signs detect karo: Namaz dry, zikr nahi lagta, deen se bore feel, 5 din consistently low TAZKIYA + TAQWA
- AI gently kahe: ‘Aap spiritually thak gaye hain — yeh bhi ek haal hai’
- Prescription: ‘Rest bhi ibadah hai’
  - 2 din lighter routine — sirf farz
  - Quran sunna — padhna nahi
  - Nature walk — zikar ke saath
  - Ek achha insaan se milna — sohbat
- Hadith: ‘Inn li-nafsika alayka haqqa’ — jism ka bhi haq hai

→ **Fitrah OS: ruhani_fatigue_addressed → TAZKIYA +6**

ENGINE 5 — SPIRITUAL RESURRECTION

Recovery aur growth ka visible track.

Fitrah OS Integration — Crystal TAZKIYA Growth

Action	TAZKIYA Points
tawbah_os_checkin (daily)	+12
tawbah_os_7day_streak (bonus)	+10
tawbah_os_30day_streak (bonus)	+25
emergency_mode_completed	+10
istighfar_70_complete	+10
shaytan_pattern_identified	+6
engine2_tawbah_complete	+8

Action	TAZKIYA Points
aqal_nafs_battle_engaged	+5
huquq_ibaad_tawbah_done	+12
sabr_builder_session	+6
private_ibadah_chamber_session	+8

Tahajjud Connection

Hadith (Bukhari/Muslim): 'Har raat Allah aasman-e-dunya par aata hai jab raat ka aakhri tehai baqi hota hai — kaun hai jo dua kare aur main qabool karun, kaun hai jo maafi maange aur main maaf karun.'

- Raat ke aakhri tehai mein user manually activate kare ya prayer time detection
- 'Deep Tawbah Mode' activate — guided session:
  - Step 1: 2 rakat tahajjud — guided
  - Step 2: Sajdah mein dua — 5 minute silence
  - Step 3: Muhasaba — aaj ki ek galti acknowledge karo
  - Step 4: Sayyid-ul-Istighfar — full text — slow
  - Step 5: Personal dua — apni zubaan mein
- End: 'Aap ne yeh waqt Allah ke saath guzara — koi nahi dekh raha tha — sirf Allah'

→ **Fitrah OS: tahajjud_tawbah_mode → TAZKIYA +15 + TAQWA +8**

Private Ibadah Chamber

Yeh feature 'use' nahi hota — yeh 'experience' hota hai. Digital masjid + personal khalwah space.

- User 'Enter' button dabaye — anytime
- App transform ho jaye:
  - Black sacred screen — soft noor
  - All notifications off
  - No distractions — ultra quiet mode
- Guided dhikr — user choose kare: Astaghfirullah / Subhan Allah / Allahu Akbar
- Breathing sync — visual inhale/exhale
- Ayat flow — slow, beautiful (from Crisis-Safe Ayaat Pool when Chamber entered via crisis)
- Use cases: Tahajjud / Tawbah / Crying to Allah / Dua / Grief
- Exit: gentle — 'Kya dil thoda halka hua?'

→ **Fitrah OS: private_ibadah_chamber_session → TAZKIYA +8 + TAQWA +5**

Sabr Builder System

User struggles with loss, delay, pain. AI sabr stages se guide kare.

- User situation bataye: Job nahi mili / Health problem / Relationship broken / Financial crisis
- AI classify kare: Imtihan / Tarbiyat / Natijah / Tanbeeh / Raf'a (Qadr Engine logic)
- Sabr ke 3 types explain kare:
  - Sabr bar obedience: Ibadat par sabit rehna
  - Sabr bar difficulty: Musibat mein shikwa nahi
  - Sabr against sins: Gunah chhodna
- Quran reflections: 2:155-157 — 'Wa bash-shir al-sabireen'
- Coping actions: specific aur doable — rona — writing — nature — sohbat
- Weekly check-in: 'Sabr mein kya farq aaya?'

→ **Fitrah OS: sabr_builder_session → TAZKIYA +6 + ILM +4**

Dua Therapy Database

Ibn al-Qayyim ki Al-Wabil al-Sayyib se — specific conditions ke liye specific duas:

Condition	Dua	Source
Gusse ke liye	Aoodhu billahi min al-shaytani al-rajeem	Bukhari/Muslim
Shahwat par control	Allahumma inni as'aluka al-huda wal-tuqa wal-afafa wal-ghina	Muslim
Qalb ki islah	Allahumma musarrifal-quloob sarrif qalbana ala ta'atik	Muslim
Kibr se bachne ke liye	Allahumma a'oodhu bika min al-kibr wal-fakhr	Abu Dawood
Addiction se nikalne	Allahumma inni a'oodhu bika min sharri nafsi	Tirmidhi
Sayyid-ul-Istighfar	Allahumma anta rabbi la ilaha illa anta khalaqtani…	Bukhari (Sahih)

SPECIAL PROTOCOLS

Waswas Protocol

Detection Sign	App Response
Ek hi gunah ke liye 3+ baar tawbah same session mein	Gentle: 'Yeh waswas ho sakta hai'
'Mujhe nahi lagta meri tawbah qabool hui' — repeat	'Allah ne sun liya — aage badho'
Ek topic par obsessive return	Ibn al-Qayyim: 'Waswas ka ilaj neglect hai'

Detection Sign	App Response

KABHI NAHI: Waswas mein baar baar tawbah encourage karna. Yeh nuqsan karta hai. Sirf: *'Aage badho — Allah ne sun liya.'*

Crisis Protocol — Khudkushi / Self-Harm — UPDATED

IMMEDIATE: Theology lecture bilkul nahi. Islamic warmth primary. Helpline subtle secondary (for safety + app store compliance + Maqasid al-Shariah hifz al-nafs).

Trigger: Words detect: 'khud ko hurt karna', 'jee nahi chahta', 'zindagi khatam', 'marr jaana chahta hun', 'end it', 'suicide', 'kill myself'

Flow:

Step 1 — Immediate soft screen transition: Screen soften — noor — all UI elements dim except crisis-specific content.

Step 2 — Quran 39:53 Full Display: *'Qul ya ibadi alladhina asrafoo ala anfusihim la taqnatoo min rahmati Allah, inna Allaha yaghfiru al-dhunuba jamee'an, innahu huwa al-ghafooru al-raheem.'*

Translation displayed beautifully — no rush, no timer.

Step 3 — AI soft message — 3 lines only:

'Allah tumhara haal jaanta hai. Usse tumhara dard chhupa nahi. Uski rehmat ne hamesha apne bandey ko wapas bulaya hai — woh tumse bhi mohabbat karta hai.'

Step 4 — Primary Action Button (Prominent, Center):

'Mujhe thodi der ke liye Private Ibadah Chamber mein jaana hai'

Step 5 — Safety Net (Subtle, Below, Smaller Font, Non-Intrusive):

"Agar abhi kisi insaani awaaz se baat karna chahte ho — yeh madad available hai:"

Country	Helpline	Availability
Pakistan	Umang: 0311-7786264	24/7, free, Urdu/English
Pakistan	Rozan Helpline: 0304-1111741	9am-5pm, Urdu/English
India	iCall: 9152987821	10am-8pm
Bangladesh	Kaan Pete Roi: 09612-119911	Daily 3pm-3am
UAE	Al Amal: 800-4673	24/7
Saudi Arabia	MoH 937	24/7
USA/Canada	988 Suicide & Crisis	24/7
UK	Samaritans: 116 123	24/7

Country	Helpline	Availability
Global fallback	Findahelpline.com (link)	Country-specific lookup

Design Rules: - Helpline numbers small font, below Primary Button - No animation, no urgency styling, no red color - Text framed Islamically: *"Kabhi kabhi insaani awaaz bhi shifaa ka raasta hoti hai — Allah ki taraf se"* - Session pause — koi aur routing nahi — sirf khamoshi aur rehmat

Step 6 — Persistent Safe Mode (Next 24 hours): Jab tak user khud deactivate na kare, next 24 hours mein: - Dashboard par "Abhi Madad Chahiye" button permanent visible - Crisis-Safe Ayaat Pool daily rotate - No "streak broken" or punishment messaging - Gentle check-in morning: "Aaj dil kaisa hai?"

Istidraj — Ultra-Rare, Unnamed, Soft Reflection Only

Concept real hai — lekin app-level mein 'istidraj' lafz kabhi nahi aayega. Agar detect hona ho to sirf ek generic muhasaba nudge.

- Detect: Gunah recurring + tawbah check-in 30+ din se zero + user be-fikr lagta hai
- Soft reflection — KABHI istidraj lafz use nahi karna:

'Kabhi kabhi lagta hai sab theek hai — lekin andar se doori barh rahi hoti hai. Is par thoda muhasaba karein.' — Bas. Koi label nahi.

CRISIS-SAFE AYAAT POOL — NEW

Rule: Crisis entry points (Emergency Mode, Help Now, Private Ibadah Chamber when entered via distress, Mental Health Bridge) mein jo ayat show ho — **random Quran se NAHI**. Curated pool se rotate. Kyun? Random se azab/warning/accountability ayaat aa sakti hain — crisis moment mein yeh damage karti hain.

Curated Pool — 30 Ayaat (Mercy, Hope, Acceptance Only)

Category A — Allah ki Rehmat (10 ayaat):

1. Quran 39:53 — "La taqnatoo min rahmati Allah…"
2. Quran 7:156 — "Wa rahmati wasi'at kulla shay'"
3. Quran 40:60 — "Ud'oonee astajib lakum"
4. Quran 2:186 — "Wa idha sa'alaka 'ibadi 'annee fa-innee qareeb"
5. Quran 42:25 — "Wa huwa alladhi yaqbalu at-tawbata 'an 'ibadihi"
6. Quran 93:3-5 — "Ma wadda'aka rabbuka wa ma qala"
7. Quran 94:5-6 — "Fa inna ma'a al-'usri yusra"
8. Quran 12:87 — "La tay'asoo min rawhi Allah"

9. Quran 15:49 — “Innee ana al-ghafooru ar-raheem”
10. Quran 20:82 — “Wa innee la-ghaffarun liman taba”

Category B — Tawbah Qabooliyat (10 ayaat):

11. Quran 3:135-136 — “Wa alladhina idha fa’aloo fahishatan…”
12. Quran 66:8 — “Tooboo ila Allahi tawbatan nasooha”
13. Quran 4:17 — “Innama at-tawbatu ’ala Allah…”
14. Quran 25:70 — “Illa man taba wa amana wa ’amila…”
15. Quran 11:3 — “Wa an istaghfiroo rabbakum thumma tooboo ilayh”
16. Quran 24:31 — “Wa tooboo ila Allahi jamee’an”
17. Quran 8:29 — “In tattaqu Allaha yaj’al lakum furqana”
18. Quran 33:43 — “Huwa alladhi yusalli ’alaykum…”
19. Quran 17:25 — “Innahu kana lil-awwabeena ghafoora”
20. Quran 71:10-11 — “Faqultu istaghfiroo rabbakum…”

Category C — Sukoon + Tawakkul (10 ayaat):

21. Quran 13:28 — “Ala bi-dhikri Allahi tatma’innu al-quloob”
22. Quran 65:3 — “Wa man yatawakkal ’ala Allahi fa-huwa hasbuh”
23. Quran 2:155-157 — “Wa bash-shir as-sabireen”
24. Quran 89:27-30 — “Ya ayyatuha an-nafsu al-mutma’innah”
25. Quran 6:54 — “Kataba rabbukum ’ala nafsihi ar-rahmah”
26. Quran 2:286 — “La yukallifu Allahu nafsan illa wus’aha”
27. Quran 14:7 — “La’in shakartum la-azeedannakum”
28. Quran 3:173-174 — “Hasbunallahu wa ni’mal wakeel”
29. Quran 28:24 — “Rabbi innee lima anzalta ilayya…”
30. Quran 21:87 — “La ilaha illa anta subhanaka…”

Implementation: `crisis_safe_ayaat.json` — har entry mein: Arabic + transliteration + Urdu translation + English translation + category tag + context of revelation (briefly).

Explicitly EXCLUDED from pool (these ayaat powerful but WRONG in crisis): - Punishment ayaat (fire, scales, hell descriptions) - Hypocrite accusations (munafiqeen descriptions) - Disaster/destruction narratives - Accountability warnings - Any ayah that could be misread as “too late for you”

MENTAL HEALTH BRIDGE — NEW

Islamic tech product honay ka matlab mental health ko ignore karna *NAHI* hai. Ibn al-Qayyim aur Imam Ghazali dono tibb-e-rooh aur tibb-e-badan ko Islamic ilm maanty thay. Yeh feature naam **“Mental Health Bridge”** ka hai — *replacement* nahi, *bridge* hai — Islamic treatment se clinical help tak.

Trigger Conditions (Any ONE activates Bridge)

1. Shaytan Pattern Recognition mein same trigger 15+ repetitions 30 din mein
2. Distress self-report 7+/10 across 5+ check-ins
3. Crisis Protocol activated 2+ times in 14 din
4. Ruhani Fatigue Detector + Istiqamah Tracker both red for 21+ din
5. User directly says: "Main depressed hun / OCD hai / anxiety hai"
6. User mentions prior diagnosis ("dawai le raha hun," "therapy chal rahi thi")

Bridge Message (Subtle, Non-Pushy, Islamically Framed)

"Alhamdulillah ke aap yahan aa rahe hain — yeh himmat hai. Ek baat share karni thi — Allah ki taraf se shifaa kayi raaston se aati hai: dua se, amal se, sabr se, aur kabhi qualified insaan ki madad se bhi. Ibn al-Qayyim ne"Tibb al-Qulub" mein likha hai ke dil ka ilaj bhi ilm hai. Agar aap ko lagay ke saath mein koi qualified counselor ya therapist ki baat karna useful ho sakta hai — yeh bhi Islamically permissible aur often beneficial hai. [Resources link - optional tap]"

Resources Screen (Optional Tap)

- Mufti-approved Muslim counselors directory (Pakistan + global)
- Country-specific mental health resources
- "Kya doctor ke paas jaana Islamically theek hai?" — scholar articles (pre-approved list)
- Duas for anxiety/depression (from Dua Therapy Database)
- Books: Al-Ghazali "Ihya" relevant chapters, Ibn al-Qayyim "Tibb al-Qulub" excerpts

Rules

- Bridge message shows maximum once per 30 din (not repeated nagging)
- User dismiss kar sakta hai — "abhi nahi" option always visible
- NO shame language, NO "you need help" phrasing
- Frame karna hai ke clinical help *Islamic* hai — foreign nahi

→ Fitrah OS: mental_health_bridge_engaged → TAZKIYA +4 (reflection ka points)

EXIT / GRADUATION PATHWAYS — NEW

Users ko locked nahi mehsoos karna chahiye. Teen dignified off-ramps:

1. Graduation (Positive Exit)

Trigger: User ne 90+ din streak maintain kiya specific gunah ke liye + addiction/habit broken self-declared + Engine 5 milestones hit.

Flow: - Congratulation screen: *"Subhan'Allah — aap ne is chapter ko band kiya. Yeh Allah ki madad thi — aap ka azm tha."* - Memory artifact banaya jaye: "Your Journey" summary — saved to Private Ibadah Chamber - Option: "Is gunah ka tracking band kar do" — user select

kare - Data archived, not deleted — user wapas aa sakta hai - Fresh start: “Koi aur cheez hai jis par kaam karna hai?”

→ **Fitrah OS: chapter_graduated → TAZKIYA +30 (one-time per chapter)**

2. Pause Mode (30-Day Break)

Use Case: User exhausted hai — spiritually thak gaya — ya life circumstance mein hai jahan intense work possible nahi (exams, family crisis, travel).

Flow: - User settings → “Pause Tawbah OS tracking — 30 din” - Streaks frozen — not reset - Daily check-ins off - Emergency Mode + Crisis Protocol still active (safety ke liye) - 30 din baad gentle return: “Welcome back — shuruat wahin se jahan chhoda tha”

3. Permanent Graceful Exit

Flow: - Settings → “Tawbah OS band karna chahta hun” - Confirmation: *“Aap ki data delete ho jayegi — yeh wapas nahi aayegi. Aap ki taraf se Astaghfirullah — aur shukriya ke is safar mein saath chalay.”* - Data fully erased (honoring privacy) - User ko darwaaza khula rehnay ka reminder: “Kabhi bhi wapas aa sakte ho — darwaaza khula hai”

Critical Rule: Kabhi guilt-trip nahi. Kabhi “Don’t leave!” popup. Kabhi “You’ll lose all progress” warnings. Dignified exit hamesha.

SESSION STATE MACHINE — NEW (Engineering Spec)

“Ek session = ek dominant goal” rule backend mein enforce ho. Session lifecycle:

States

```
NEW_SESSION → TIER_DETECTED → GOAL_SELECTED → ENGINES_ACTIVE →
COMPLETED/ABANDONED
```

Rules

1. **Session Start:** User Tawbah OS mein kuch bhi tap kare → new session object created
2. **Tier Detection:** First meaningful interaction (user self-select + AI confirmation) → tier locked for session
3. **Goal Selection:** User ne kaunsa path choose kiya (tawbah / habit-break / check-in) → goal locked
4. **Engines Active:** Sirf tier ke allowed engines activate hon (LIGHT: 1+2 only, MEDIUM: 1+2+3+4, SEVERE: all)
5. **Session End Conditions:**
   - User explicitly closes session (“Main nikaltaa hun”)
   - 15 min inactivity auto-pause → 1 hour then session_ends
   - Emergency Mode completed → session_pauses, user prompted to continue or end

6. **Session Resume:** Next open within 4 hours → "Pichli baar aap [X] par thay. Continue karenge ya naya shuru?"

Critical Constraint

Within a session, engines cannot cross-trigger beyond tier allowance. Example: LIGHT session mein AI Engine 0 suggest nahi kare ga even if pattern dikhe. User ko next session mein MEDIUM tier invite kare ga.

Data Schema (tawbah_sessions table)

```
session_id (uuid)
user_id (encrypted)
started_at (timestamp)
ended_at (timestamp, nullable)
tier (enum: light/medium/severe)
goal_type (enum: tawbah/habit/checkin/crisis)
engines_activated (array)
outcome (enum: completed/abandoned/paused/crisis_escalated)
fiqh_context (enum: hanafi/shafi/maliki/hanbali/ahle_hadith)
```

ALL TAWBAH OS ACTIONS → FITRAH AI (BACKEND ONLY)

Tawbah OS mein **KABHI raw points frontend par nahi dikhenge**. 'You earned 12 points' — yeh Tawbah OS ka tone nahi hai. Points BACKEND mein silently log honge. Frontend par sirf: spiritual growth signals — Crystal mein change — Nafs level progress.

Action Key	Dim	Points	Cap
tawbah_os_onboarded	TAZKIYA	+5	once
tawbah_os_checkin	TAZKIYA	+12	1/day
tawbah_os_7day_streak	TAZKIYA	+10 bonus	as achieved
tawbah_os_30day_streak	TAZKIYA	+25 bonus	as achieved
emergency_mode_completed	TAZKIYA	+10	3/day
istighfar_70_complete	TAZKIYA	+10	1/day
tawbah_roadmap_complete	TAZKIYA	+8	2/day

chapter_graduated	TAZKIYA	+30	per-chapter

ISLAMIC RED LINES — APP KABHI NAHI KAREGA (UPDATED)

Never	Reason	Instead
‘Aapki tawbah qabool ho gayi’	Sirf Allah jaanta hai	Nishaniyaan batao + disclaimer
Waswas mein baar baar tawbah encourage karna	Ibn al-Qayyim: Nuqsan karta hai	‘Aage badho — Allah ne sun liya’
Huquq-ul-Ibaad mein sirf tawbah suggest karna	Allah maaf nahi karta jab tak woh insaan na kare	Maafi maangne ki guide karo pehle
Shame create karna	Islam mein sitr —	Al-Awwaboon angle always

Never	Reason	Instead
	chhupaana	
Crisis mein theology lecture / numbers	Insan ko support chahiye — hujjat nahi	Warm Islamic comfort + Quran 39:53 + subtle helpline
Tier-3 fiqh complexity ka final AI ruling	Intra-fiqh sub-school differences	AI Mufti refer — module 2
Waswas aur actual struggle confuse karna	Serious distinction hai	Pattern clearly detect hone par hi use karo
Riya / kibr / hasad direct diagnose karna	Spiritually destabilizing + resistance	Suggestive reflection only: 'Shayad is area mein…'
Istidraj regular feature banana	User ko spiritually destabilize kar sakta hai	Ultra-rare, ultra-soft, non-assertive reflection only
Raw points frontend par dikhana	Tawbah sacred domain — gamification feel	Backend only — frontend par spiritual growth signals
Ek session mein sab engines chalaana	User overwhelmed ho jata hai	Session state machine enforces tier allowance
System-wide device usage tracking	Privacy risk + OS permission scrutiny + conservative user concern	In-app data only — user-logged triggers primary
Random Quran ayat crisis moment mein	Azab/warning ayat damage kar sakti hai	Crisis-Safe Ayaat Pool (curated 30 ayaat)
Mental health clinical condition ko sirf "shaytani loop" kehna	Professional help se rokna	Mental Health Bridge — both Islamic treatment + clinical resource offered
"Poochho mufti se kisi aur fiqh ke liye"	App automatically handles via user's selected fiqh	Fiqh-aware auto-delivery per user onboarding selection
User ko lock-in mehsoos karwana	Trust break hoti hai	Graduation + Pause + Exit pathways dignified

CODE-ENFORCED SAFETY MIDDLEWARE — NEW (Engineering Spec)

Yeh section developer ke liye hai. Red lines sirf prompt instruction nahi — code middleware enforce kare.

Middleware Layer 1 — Kafarat 3-Layer Wrapper

```
def kafarat_safety_wrapper(ai_response, user_fiqh):
    kafarat_keywords = ['kafarat', 'kaffarah', 'fidya', 'expiation',
                        'roza toda', 'qasam toodi', 'zihar']
    if any(k in ai_response.lower() for k in kafarat_keywords):
        wrapper = f"""
        ---
        1) Yeh guidance {user_fiqh} fiqh ke mutabiq hai.
```

```
        2) Aap ke individual case ki tafaseel mein kuch farq ho sakta
hai.
        3) Behtar hai ki AI Mufti se confirm kar lain.
        """
        return ai_response + wrapper
    return ai_response
```

Middleware Layer 2 — Crisis Detection Override

```
def crisis_detection_override(user_input):
    crisis_patterns = ['khud ko hurt', 'jee nahi chahta', 'marna
chahta',
                       'suicide', 'kill myself', 'end it', 'zindagi
khatam']
    if any(p in user_input.lower() for p in crisis_patterns):
        return CRISIS_PROTOCOL_FLOW  # Bypass normal engine routing
    return normal_engine_flow(user_input)
```

Middleware Layer 3 — Tier Enforcement

```
def engine_activation_check(engine_name, current_session):
    allowed_engines = {
        'light': ['engine_1', 'engine_2'],
        'medium': ['engine_1', 'engine_2', 'engine_3_basic',
'engine_4'],
        'severe': ['engine_0', 'engine_1', 'engine_2', 'engine_3',
'engine_4', 'engine_5']
    }
    if engine_name not in allowed_engines[current_session.tier]:
        return BLOCK_AND_DEFER_TO_NEXT_SESSION
    return ALLOW
```

Middleware Layer 4 — Qabooliyat Claim Block

```
def qabooliyat_claim_filter(ai_response):
    banned_phrases = ['tawbah qabool ho gayi', 'Allah ne maaf kar
diya',
                      'aap ki maghfirat ho gayi', 'tawbah accepted']
    for phrase in banned_phrases:
        if phrase in ai_response.lower():
            ai_response = ai_response.replace(phrase, '[CENSORED -
REDIRECT TO NISHANIYAAN]')
            log_violation(phrase, ai_response)  # Alert dev team
            return fallback_to_nishaniyaan_response()
    return ai_response
```

Middleware Layer 5 — Crisis-Safe Ayaat Filter

```
def ayat_filter_for_context(ayat_candidate, context):
    if context in ['crisis', 'emergency_mode', 'broken_state',
'mental_health_bridge']:
        if ayat_candidate not in CRISIS_SAFE_AYAAT_POOL:
            return random.choice(CRISIS_SAFE_AYAAT_POOL)
    return ayat_candidate
```

Yeh 5 middleware layers har AI response par chalein gi — no exceptions.

PHASE 1 LAUNCH READINESS — WHAT WILL SHIP

v3 integration ke baad Phase 1 launch mein yeh ship-ready hai:

Component	v3 Status	Phase 1 Ship?
Overview + 3 Tiers + Bab-ul-Tawbah	✅ Complete	Yes
Fiqh-Selection Onboarding	✅ Specified	Yes
Entry Points (all 3)	✅ Complete	Yes
Engine 0 (Amraaz-ul-Qalb)	✅ Detection spec ready	**Phase 1.5** (needs 3 months live data first for detection calibration)
Engine 1 (Nafs Diagnosis)	✅ Complete	Yes
Engine 2 (Tawbah Roadmap)	✅ Fiqh-aware ready	Yes
Engine 3 (Habit Breaking)	✅ Complete + MH Bridge	Yes
Engine 4 (Accountability)	✅ Complete	Yes
Engine 5 (Resurrection)	✅ Complete	Yes
Crisis Protocol	✅ With helpline	Yes
Crisis-Safe Ayaat Pool	✅ 30 ayaat specified	Yes (needs scholar verification)
Mental Health Bridge	✅ Complete	Yes
Exit Pathways	✅ Complete	Yes

Code-Enforced Middleware	✅ Spec complete	Yes (non-negotiable)
Fiqh Rulings Database	⏳ JSON to be built	**Blocking — must build before ship**

SCHOLAR REVIEW CHECKLIST — BEFORE SHIP

Yeh items pre-launch scholar sign-off chahiye (Fatwa Advisory Board — Hanafi + Shafi'i + Ahle Hadith background members):

1. ✅ Fiqh rulings table (kafarat scenarios) — each fiqh verified
2. ✅ 7 Heart Diseases detection questionnaire — Islamic alignment
3. ✅ Crisis-Safe Ayaat Pool (30 ayaat) — context appropriateness
4. ✅ Dua Therapy Database (6+ duas) — Sanad + grade verification

5. ✅ Tier-3 Fiqh Complexity list — scholars agree these need human referral
6. ✅ Helpline integration framing — Islamic justification language
7. ✅ Mental Health Bridge framing — scholarly support for “tibb-e-rooh + tibb-e-badan”
8. ✅ Tawbah Nishaniyaan (6 signs) — sources verified
9. ✅ 7 Qabooliyat Times — sanad verification
10. ✅ Al-Awwaboon framing — theological soundness

وَمَا تَوْفِيقِي إِلَّا بِاللَّهِ

“My success is only through Allah.” — Hud 11:88

BARKAH FLOW — Tawbah OS — Complete Workflow v3.0 — Fiqh-Aware + Safety-Integrated
